WORK EXPERIENCE

Personal Projects / Academic Projects

2024 - Present

Frontend Developer

- Designed and developed responsive web applications using React, Tailwind CSS, DaisyUI, and modern JavaScript practices.

KeenKeeper Friend Tracking App

React, Tailwind CSS, DaisyUI, React Router, LocalStorage, Recharts

- A friend-tracking web app with quick check-ins, timeline history, statistics, and responsive UI.
- The main challenge was keeping timeline data persistent while maintaining clean route-based navigation and responsive layouts for mobile devices.

Class Routine Web App

React, Tailwind CSS, DaisyUI, React Router, React Icons

- A responsive class routine app with current class display, filters, and clean student-friendly interface.
- The challenging part was designing a mobile-first routine layout that stays readable while showing enough schedule information.

Weather App

Python, API, Django, DaisyUI

- A weather search application that shows city-based weather information with a clean animated interface.
- The key challenge was handling API errors, empty searches, loading states, and showing data in a user-friendly format.

SKILLS

- HTML
- CSS
- JavaScript
- React JS
- Tailwind CSS
- DaisyUI
- Git & GitHub
- VS Code
- Netlify
- C++
- Python
- Problem Solving
- Data Structures
